Seating

Hokki Stool.

Talented Movement. The Hokki's innovative design increases the desire for a dynamic sitting behavior. Sitting on a stool is no longer a non-ergonomic stagnancy, but it is connected with playful mobility. The convex design of the base makes the seat freely movable in all directions. The special floor rubber base designed for increased safety prevents the Hokki from sliding.

Agile and functional. The body of the Hokki is made of fully recyclable polypropylene, so it is extremely scratch resistant, and even under harsh everyday conditions it is not easily damaged. Such durability ensures a long life and usability of the product, a contribution to the conservation of natural resources.

PantoSwing-Lupo Flexing cantilever chair.

Tested and recommended by the Federal Association of German Back Schools Association and the Forum Healthy Back - Better Living Association For more information AGR eV, PO Box 103, 27443 Selsingen, Germany. www.agr-ev.de

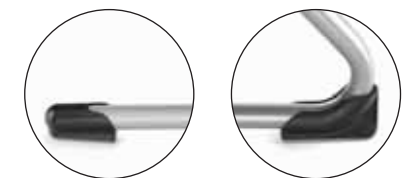

Forward tilting seat. In the front seating position, the seat is inclined forward, so the playing position at the table is efficiently supported and stimulates the spine to a dynamic balance. The seating surface also adapts to the children's shift weight to the rear and so the back is relieved in a relaxed position.

Comfortable and environmentally friendly air cushion seat shell. The PantoSwing-LuPo is equipped with a double-walled plastic shell. Thanks to the finest perforations in the surface, a comfortable air cushion effect is created. The hard-wearing polypropylene material is fully recyclable. Behind this is a VS development that has already proven itself successful for many years.

Floor protection glides. The PantoSwing-LuPo is equipped with durable, floor-friendly, two-component glides.

PantoSwing-MM
Flexing cantilever
chair with wooden
seat.

Vibrant, dynamic sitting. This chair follows the needs of the child: the cantilever Panto Swing-MM proves to be extremely flexible and versatile in its seating possibilities. For example, it is well-suited for child-friendly sitting astride and invites for changes in positions. Children can find and invent new seating positions in a physiological, ergonomically favorable and playful way.

Floor protection glides. The Panto-Swing-LuPo is equipped with durable, floor-friendly, two-component glides.

Compass-VF Sturdy stackable chair with wooden seat.

More flexibility in space planning. The four-legged Compass VF chairs have a practical handle hole for easy handling in the back. To save space, they can be stacked to a height of up to ten chairs and come with buffers to protect the frame. This allows spaces to be quickly adapted as needed for different games and group activities. The shell of beech plywood is fitted with an anti-slip paint. Therefore, these chairs can play a major supporting role any time on a turbulent day in an early childhood center.

Colorful palette. The seat shell of the Compass VF comes in a vibrant variety of colors suitable for children.

Floor protection glides. The Compass VF is equipped with durable, floor-friendly, two-component glides.

PantoMove-LuPo Height-adjustable five-star swivel chair for active seating.

Tested and recommended by the Federal Association of German Back Schools Association and the Forum Healthy Back - Better Living Association
 For more information AGR eV, PO Box 103, 27443 Selsingen, Germany. www.agr-ev.de

Sitting with 3D rocking mechanism. The seat of the PantoMove-LuPo moves dynamically in all directions. Thus, both the front seating positions as well as a relief for body shifting to the rear are supported. Through this dynamic sitting, different muscle groups are alternately activated and stimulated, and blood circulation is stimulated significantly. The special seat dynamics prevents an early occurrence of postural deformity and back pain in children.

Comfortable air cushion seat. The PantoMove-LuPo is equipped with a double-walled plastic shell. The fine perforation provides a comfortable air cushion effect while sitting. The ergonomically-inviting shell shape allows a wide variety of seating positions.

Stepless height adjustment. With its gas lift height adjustment, the chair grows with you and can easily be used by people of different ages and heights.

For all floors. All PantoMove chairs come with an option of soft or hard castors, as well as 2-component or plastic glides. That makes this chair suitable for all floor surfaces.

PantoMove-LuPo KiGa Five-star swivel chair for early childhood teachers.

Tested and recommended by the Federal Association of German Back Schools Association and the Forum Healthy Back - Better Living Association For more information AGR eV, PO Box 103, 27443 Selsingen, Germany. www.agr-ev.de

Healthier work conditions in early childhood environments. The PantoMove-LuPo KiGa was designed for health prevention based on ergonomic requirements for nursery-school teachers. This chair helps avoid physical stresses otherwise caused by furniture that is only intended for children's use and made for smaller body measurements.

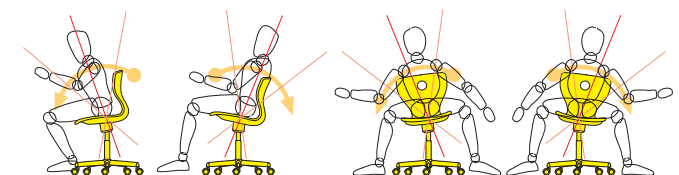

Swivel chair with special height range adjustment. This swivel chair has a special range of stepless height adjustment - from adult seat height all the way down to children's height levels. However, at the same time it offers the comfort of an adult-sized seat shell. The patented

3D rocking mechanism of all PantoMove chairs allows for easy adjustment to all dimensions of movement: forward, sideways and backwards - and therefore supports all seating positions.

For all floors. All PantoMove chairs come with an option of soft or hard castors, as well as 2-component or plastic glides. That makes this chair suitable for all floor surfaces.

PantoMove-VF KiGa Five-star swivel chair for early childhood teachers.

3D rocking mechanism for dynamic sitting. The Panto-Move-VF has a 3D rocking mechanism that promotes dynamic sitting. Following the body tilt, the seat surface supports the exchange between active and passive seating positions. For this purpose, it moves accordingly to the front, back or sideways. The beech wood shell can also be furnished with fabric upholstery.

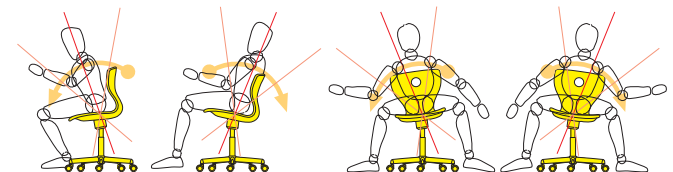

Swivel chair with special height range adjustment. The PantoMove-VF is designed for use in areas with varying sized children and thus has a special range of stepless height adjustment – from adult seat height all the way down to children’s height levels.

The patented 3D rocking mechanism of all PantoMove chairs allows for easy adjustment to all dimensions of movement: forward, sideways and backwards – and therefore supports all seating positions.

For all floors. All PantoMove chairs come with an option of soft or hard castors, as well as 2-component or plastic glides. That makes this chair suitable for all floor surfaces.

PantoMove-LuPo Plus Five-star swivel chair for sit-at and stand-at tables.

PantoMove-LuPo Plus with foot rest. The PantoMove-LuPo Plus with an adjustable seat height of 19 1/4" to 27 1/8" offers a particularly large range of height adjustment. It can be used not only at seating tables, but also at standing tables. The adjustable foot rest assures a comfortable support for the feet at any height. The seat provides an air cushioning effect for the best seating comfort.

Sitting with positive physiological effects. With its innovative, dynamic 3D-rocking mechanism seat, the PantoMove-LuPo Plus fits perfectly to the dimensions of the body in motion - the seat surface tilts forward, sideways or backwards. Thus, the ergo-

nomie chair accompanies every body movement.

For all floors. All PantoMove Plus chairs come with an option of self locking soft castors, as well as 2-component or plastic glides. That makes this chair suitable for all floor surfaces.

Cloud Beanbag elements.

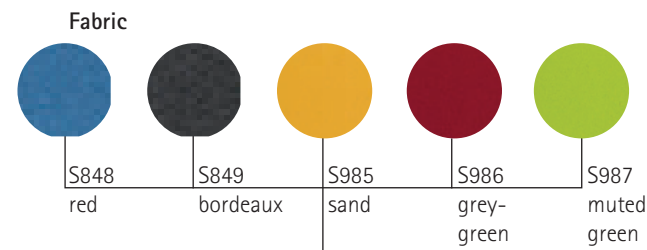

Like sitting on cloud nine. Relaxed sitting for children is offered in the beanbag, stool, flat pouffe and pouffe. Here the kids come to rest - while reading, listening and dreaming. The seating elements adapt to the body and provide shelter. As a special quality characteristic, the Clouds have a separate inner bag, which prevents the escape of the filling. The cover is made of durable Cordura certified to Oeko-Tex standard.

Dirt-repellent, easy to care for and safe. Cloud beanbags and pouffes are fitted with a machine washable Cordura® cover; which is oil, water and stain repellent. The seating elements are filled with flame retardant polystyrene beads in accordance to DIN 4102 B1 EPS, and the liner is removable and can be dry-cleaned.

ClubLounge Colorful seat and sofa elements.

A variety of fresh colors. ClubLounge provides kids and teachers from pre-K through higher education with fresh-friendly seating options. Sleek, colorful and inviting to everyone; these comfortable elements will soon be a popular destination for all children.

Diversity by combining individual elements. Individual seating areas are easily created by combining various elements of the ClubLounge furniture. With its durable foam core they are ideally suited for the highest demands.

Hygiene and safety protection. ClubLounge elements are fitted with a flame retardant foam core. The stain-resistant synthetic leather surface is not only extremely durable, but for an optimal health status also washable, anti-microbial and anti-mycotic.

Puzzle Innovative free-form group table.

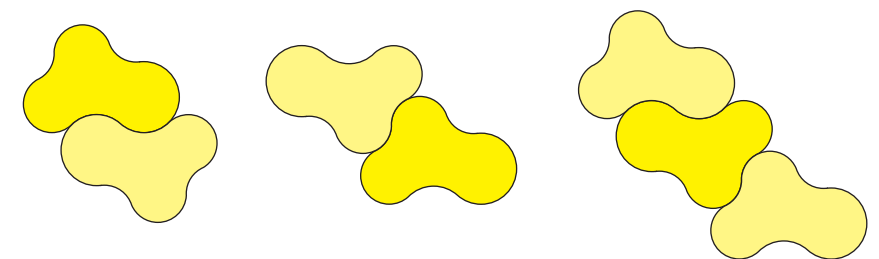

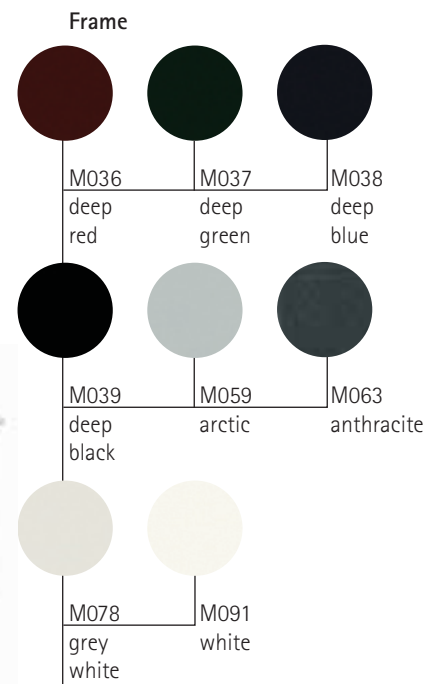

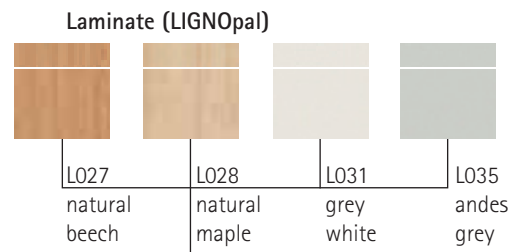

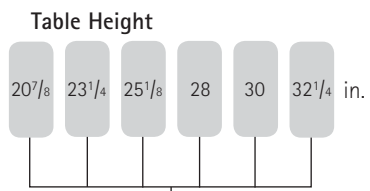

Small table—great space saver. The Puzzle, with its independent free-form surface, provides a large space for individual children and small groups. Thanks to its unique shape, it doesn't matter if small groups turn out to be larger. The Puzzle has no problem offering enough space for up to ten children to paint or play. This is enabled through its innovative table design: the size is enlarged by indentations creating additional space for children. The Puzzle sets fresh accents with its table top.

With "Puzzle" one fits the other. The tables can also be pushed together to form larger units. The basic amoeba shape proves to be organically intelligent. Puzzle tables have no sharp edges; they are also available with an optional noise-retardant, easy to care linoleum surface.

LiteTable Stackable lightweight table.

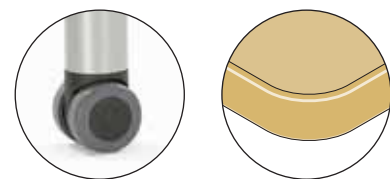

Lightweight for easy handling. The LiteTable is a real lightweight, yet extremely durable due to its high strength tabletop. If needed, it can be easily moved to the side on its two optional castors. With its pairwise, inside or outside arrangement of the legs, the LiteTable can also be stacked (up to seven), but still can be lined up without gaps. So you can gain a lot of space quickly, even though the tables remain in the room.

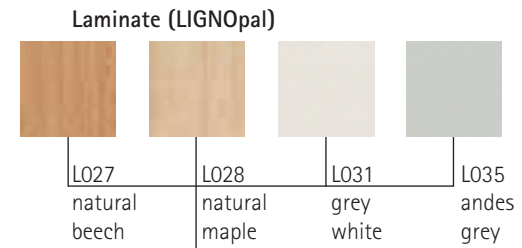

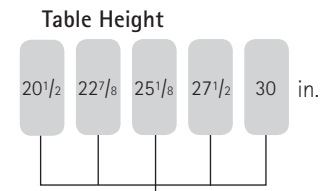

Flexible or connected. The LiteTable can optionally be equipped with a table connector, so the tables can be linked as needed.

Safety through rounded corners. The table tops have a circumferential edge protection. Some table corners are rounded for safe everyday use.

Network Sturdy, flexible, multi-purpose table.

Group tables of basic elements. Open up a variety of combinations with simple basic elements: This is the idea behind the Network tables. With the rectangular, square, trapezoidal or semi-circular elements, the table is the right choice for different sized groups. The spontaneous and adequate arrangements of the tables is made easier by two optional locking castors, so that the tables are always easy to move. For safe everyday use, the edges can be rounded.

playgrounds, meeting rooms or as a desk in administration and office. With a wide range of accessories, a base table can be turned into a highly functional workplace.

RondoLift-KF Height-adjustable sit-at and stand-at table.

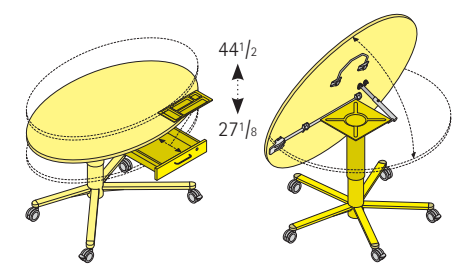

Stepless height adjustment. The RondoLift table is equipped with a convenient gas lift height adjustment. The release lever easily adjusts to the desired height - from 27 1/8" to 44 1/2". So you can work at the RondoLift not only while standing, but also when you are sitting. Therefore, the table is a valuable tool for the ergonomically important change in work positions. The RondoLift is available with different top shapes and sizes. Some tables come with an optional lockable drawer.

Castors for mobility. With its locking casters the rondo lift is highly mobile and versatile. The option of tilting tops, available on most models allows for easy movement from room to room.

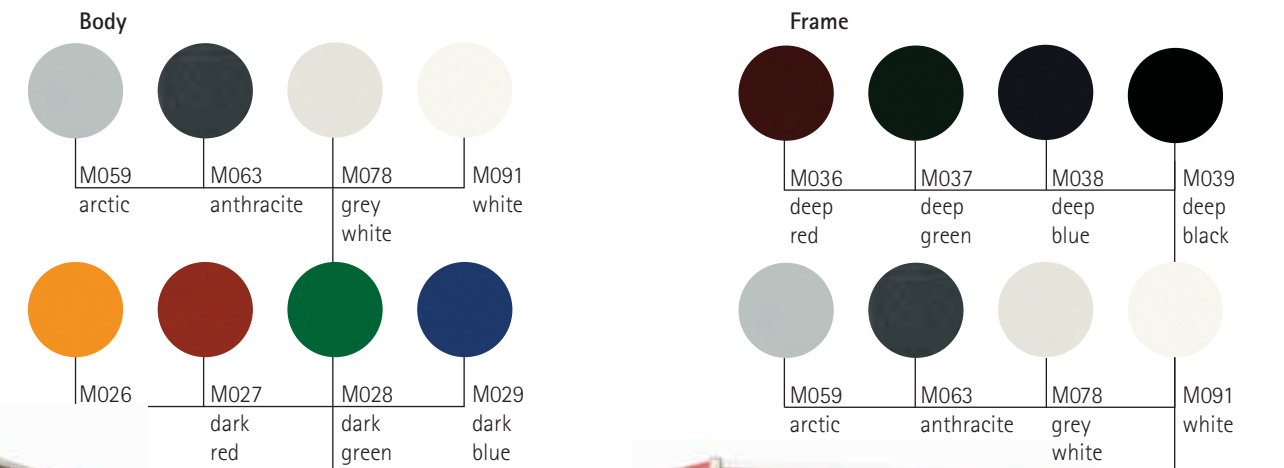

Contact your VS Representative for pricing and ordering or email: info@vs-charlotte.com
www.vs-network.com

Point of contact for short meetings. With the RondoLift you can quickly create a small, informal meeting area. Here you can meet and interact spontaneously in a small group.

Series 600 Mobile clothes, shoe, satchel or compartment cupboard.

High mobility as a standard. The Series 600 elements are equipped as standard with locking casters. This guarantees easy mobility at all times. The cabinets are mobile and therefore they can be used flexibly "on the scene of action."

Sturdy frame construction. Series 600 storage cabinets feature a sturdy powder-coated steel frame for maximum wear. The bottom is made of a steel sheet and sides and back are made with powder-coated, fresh-colored perforated metal plate elements.

These mobile Series 600 cabinets have a lot to offer. E.G. the "Shoe Closet" has 20 generously sized inner compartments to store board games, books or materials. Everything is always well sorted and quickly available.

Shoe cabinet below, wardrobe above. These mobile combination modules hold anything that might get in the way while playing in the classroom: 10 shoe compartments ensure an orderly transition from street- to house shoes, the generously sized element in the upper part, with its six triple hooks it's the right wardrobe for jackets and bags.

48135 WxHxD 49⁵/₈ x 37³/₈ x 17³/₈ (six cubbies)
48136 WxHxD 49⁵/₈ x 37³/₈ x 17³/₈ (eight cubbies)

Profil-800 Half-cupboard with small compartments.

To each his own personal solid wood box. Equipped with small compartments this open half-cabinet from the series Profil-800 can accommodate up to 16 boxes of solid wood, which provide children with a personal storage space. The wide variety of colors for the boxes gives a charmingly fresh color accent to any classroom. Several cabinet sizes available.

Rugged, durable and reliable day after day. Profil-800 cabinets are constructed from laminated bodies; the bodies are made of high quality melamine faced particleboard LIGNOpal. Legs and duct are made of solid wood in a distinctive square profile; for additional stability a solid cross-cut is used on the lower shelf.

Material Trays Wood and plastic trays.

Boxes made of solid wood. These classic boxes have a handle hole for easier handling. A high stability is reached thanks to the special joints of the box, and all corners are rounded. The rich color palette offers the possibility of bright color accents.

Stackable, lightweight and very stable. The storage boxes are made of plastic, and are available in three standard heights (other sizes on request). They are stackable and extra strong, yet extremely lightweight. Thus, even kids can handle them quite easy. The boxes are made of flame-retardant, recyclable, shatterproof plastic. They are ideally suited as storage boxes for groups, or in craft applications. All sizes can be used in the Series 600, Series 800 and Profil-800 cabinets.

Series 2000 Folding screen system.

Mobility with high stability. Series 2000 screens with casters are free to move. With its integrated safety push handle and its sturdy, yet delicate aluminum frame construction, high stability is always guaranteed. The handle facilitates the handling of the multipart elements.

Create functional zones. With the Series 2000 mobile screens, you can instantly separate play and learning areas for different groups within a room. Later, the screens can be folded to save space and set aside.

Large surface selection. There are different materials to choose from for the screens, for example decorative surfaces, white or chalk board elements (made of enameled steel) or push-pin materials. Thus, the screens can be integrated directly into the activities of children.

Available accessories. There are many accessories to accompany your mobile and free standing Series 2000 screens: magnetic wiper for whiteboard (Mod. 6962), magnets (Mod. 7947), board markers (Mod. 6966), magnetic pen holder (Mod. 7963), magnetic flip chart rail (Mod. 9001-GN38334) and flip chart paper (Mod. 6547).

Further details and dimensions on request.

Commitment to environmentally friendly production.

The high real net output at the company's headquarters guarantees consistent quality and environmental standards continuously monitored by means of certified management systems. The internal suggestion system and improvement management are also geared towards the continuous saving of resources.

This approach follows the company's guiding principle of handling natural resources responsibly and of minimising as far as possible the impact of production on the environment. VS' aim is to be able to offer our customers products which have been manufactured in the most ecofriendly way possible. We can assure our customers that we manufacture our products in accordance with the strictest environmental standards – from purchasing the raw materials, across all the production phases and through to the recycling of used materials as well as the delivery process and customer support.

Company guidelines.

- We manufacture furniture in accordance with the highest quality requirements, organising production along holistic and environmentally aware lines so as to impinge on natural resources as little as possible.
- We utilise natural raw materials so as to have the smallest possible impact on the environmental balance sheet. Our production processes are safe and environmentally compatible, and waste from production is responsibly disposed of. We recycle wood, steel, plastics and other used materials.
- Our entire production is continuously monitored so as to ensure the lowest possible pollutant emissions and consumption of raw materials.
- We manage our energy consumption as efficiently as possible, optimise our use of raw materials and by choice use regenerative forms of energy.
